

Vertical Ergonomic Design

Adjustable DPI Switch

Optical Sensor

■ Vertical Ergonomic Design

Our vertical ergonomic design helps you achieve a more natural grip, better forearm support, and a more natural wrist position. Unlike traditional mice, the Adesso iMouse V1 will fit right into the grasp of your palm and provides better support for your forearm, which minimizes wrist pain that often result from forearm muscles twisting.

■ Adjustable DPI Switch

Attain higher precision and better accuracy with your choice of adjustable DPI levels. Easily switch from 4 different DPI levels from 800, 1200, 1600 to 2400. The easily-accessible DPI button lets you quickly switch cursor sensitivities between the various computer tasks you have throughout the day.

■ Enhanced Optical Sensor

Optical sensor technology improves precision and even lets you work on most wood, marble and leather surfaces without a need of mouse pad.

■ Plug-and-Play

Simply plug the iMouse V1 mouse into a USB port and you will be up and running. No drivers required.

Specifications:

Tracking Method	Optical Sensor
DPI Resolution	4 Levels 800 /1200/1600 /2400
Buttons	6 Buttons (Left & Right Click, Back & Forward, DPI Switch, Scroll Wheel and Middle Button)
